

Safety Instructions

- 1) Read and follow all instructions in your Garage Door Operator Manual.
- 2) Never let children operate or play with the Door Controls. Keep the Remote Control away from children.
- 3) Always keep the moving door insight and away from people and objects until the door is completely closed. No one should cross the path of the moving door.
- 4) Never go under a stopped, partially open door.
- 5) Test the reverse mechanism of the opener monthly. The door MUST reverse on contact with a 1-1/2" high object (or a 2" x 4" board laid flat) at the center of the doorway on the floor. After adjusting either the Force or the Limit of travel, retest the door opener. Failure to adjust the opener properly may cause severe injury or death. See [Monthly Maintenance](#) for more details.
- 6) When possible use the emergency release only when the door is closed. Use caution when using this release with the door open. Weak or broken springs are capable of increasing the rate of door closure and increasing the risk of severe injury or death.
- 7) Keep garage doors properly balanced. An improperly balanced door increases the risk of severer injury or death. Have a professional make repairs to cables, spring assemblies, and other hardware. See [Monthly Maintenance](#) for more details.

QUESTIONS???
